

Catch::Clara::Detail
::ResultValueBase::value

Catch::Clara::Detail
::ResultValueBase::value

Catch::Clara::Detail
::ResultBase::enforceOk

```
graph LR; A[Catch::Clara::Detail::ResultValueBase::value] --> C[Catch::Clara::Detail::ResultBase::enforceOk]; B[Catch::Clara::Detail::ResultValueBase::value] --> C;
```

The diagram illustrates a mapping or transformation. On the left, there are two identical white rectangular boxes, each containing the text 'Catch::Clara::Detail::ResultValueBase::value'. Blue arrows originate from the right side of each of these boxes and point towards a single gray rectangular box on the right. This gray box contains the text 'Catch::Clara::Detail::ResultBase::enforceOk'. The arrows indicate that the 'value' property of the 'ResultValueBase' is being mapped to the 'enforceOk' method of the 'ResultBase'.
