

Catch::Generators::
GeneratorUntypedBase
::skipToNthElement

```
graph LR; A[Catch::Generators::GeneratorUntypedBase::skipToNthElement] --> B[Catch::Generators::Detail::throw_generator_exception]; B --> C[Catch::throw_exception];
```

The diagram illustrates a sequence of three function calls. The first box, with a gray background, contains the code 'Catch::Generators::GeneratorUntypedBase::skipToNthElement'. A blue arrow points from this box to the second box, which has a white background and contains 'Catch::Generators::Detail::throw_generator_exception'. Another blue arrow points from the second box to the third box, which also has a white background and contains 'Catch::throw_exception'. All boxes have a thin black border.
