

Catch::TablePrinter
::open

Catch::Clara::Parser
::writeToStream

Catch::TextFlow::Spacer

```
graph LR; A[Catch::TablePrinter::open] --> C[Catch::TextFlow::Spacer]; B[Catch::Clara::Parser::writeToStream] --> C;
```

The diagram illustrates a flow or dependency. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'Catch::TablePrinter' followed by '::open' on a new line. The bottom box contains 'Catch::Clara::Parser' followed by '::writeToStream' on a new line. Two blue arrows originate from the right side of these boxes. The arrow from the top box points to the left side of a gray rectangular box on the right. The arrow from the bottom box also points to the left side of the same gray box. The gray box contains the text 'Catch::TextFlow::Spacer'.
