

Catch::LeakDetector
::~~LeakDetector

Catch::Session::~~Session

Catch::cleanUp

```
graph LR; A[Catch::LeakDetector  
::~~LeakDetector] --> C[Catch::cleanUp]; B[Catch::Session::~~Session] --> C;
```

The diagram illustrates a cleanup mechanism. Two destructors, `Catch::LeakDetector::~~LeakDetector` and `Catch::Session::~~Session`, are shown in white boxes on the left. Blue arrows point from each destructor to a gray box on the right labeled `Catch::cleanUp`, indicating that both destructors call this static function to perform cleanup.
